## Steps to Create a Team for a Kaggle Competition

- **Go to the competition page** where you want to submit.
- On the competition page, look for the **"Team"** tab or scroll to the **"Team" section** in the sidebar (usually near "Submissions").
- Click on **"Team"** → Then click **"Create or Join a Team"**.

*Invite your friends by their Kaggle usernames.*

*Each invited person will get a notification or email to accept the team request.*

- Once all your friends accept, your team is officially created.
- Your **team's name** will be shown on the leaderboard when you make a submission.
- **Only one person from the team needs to submit**, and it will count for the entire team.

### Important Notes

- Once you're in a team, you **can't leave or form another** team for that competition.
